

hard
medium
soft

Diamond Tip
20 degree angle. Makes it great for tight corners and available in four different durometers to fit your preference.

White Diamond Tip
A2309W

Yellow Diamond Tip
A2309Y

Red Diamond Tip
A2309R

Green Diamond Tip
A2309G
Great for paint protection installations.

Contour
This versatile tool has a unique shape to naturally spread out finger tension and help with installations of film and paint protection on non-flat surfaces.

Yellow Contour
A204

TOP PICK !

Green Contour (Softer than the Yellow)
A210
Great for paint protection installations.

Tail Fin
Great tool for getting behind the hard-to-reach 3rd brake lights. Negative curve to keep constant pressure on the film.

Yellow Tail Fin
A203 (11.5" wide edge)

Green Tail Fin (Softer than the Yellow)
A209 (11.5" wide edge)

Bull Dozer
For automotive and flat glass applications these tools give you the extended reach you'll need.

Automotive Bull Dozer
A207 (6" blade)
Reach into the tightest rear deck area with ease! This tool has a 15" overall length and a rubber squeegee tip. A must have tool!

TOP PICK !

Flat Glass Bull Dozer
A208 (6" blade)
Like the Automotive Bull Dozer, this unit helps you reach hard to reach areas on a flat glass install. Longer ribs provide more stiffness. This tool has a 15" overall length and a rubber squeegee tip.

Slammer
A2402Y (6" wide edge)
Use as an edge guide or installation tool. Handle provides increased leverage.

The Cleaver
A206 (6.5" wide edge)
Inexpensive tool to reach rear deck areas. Feels great in your hand.
