

## Non-Contact Thermometers

Raytek Non-Contact Thermometer(s)  
L1340 (with laser)  
L1341 (without laser)  
Our Digital non-contact Thermometers offer a simple method for illustrating the need for your high performance window films. For in-home demonstrations, you can measure the extreme temperature of furnishings near a window to illustrate the poor performance of their old windows. This is an extremely convincing sales pitch. The L1340 includes a laser pointer to better illustrate the exact surface location being tested.

**NEW!** ThermoHawk 200  
Q31-TH200  
An inexpensive way to measure surface temperature during a sales presentation. This is easy to use and will help you close more sales.

Tint Meter Model 100  
LL100  
Measures light transmission on roll-down windows. Just slide the meter over the top of the window for the tint percentage. Easy to operate and very accurate with auto on/off switch.

### Residential Windows Book S1300

Have you ever found yourself in an awkward situation when a customer asks you a difficult technical question about window performance that you just don't have the answer for?

Do you ever wish you had a better understanding of windows so you could deliver a more effective sales presentation? "Residential Windows" is the perfect book for equipping your sales staff with the knowledge to better understand just what makes a window perform and is a **great resource for sales**. "Residential Windows" is the perfect complement to our SK1330 and SK1330+ Sales Kits.

Tint Meter Model 200  
LL200  
Measures light transmission on any window. Two piece design with suction cups to hold meter in place so that even the back window can be easily tested.

High quality tape measures without the high price. Three sizes available.
